RE: Reference Timlin Construction Ltd

Timlin Construction has been engaged by John Paul Construction on a number of our projects in the Dublin area to carry out the demolition package.

Works carried out by Timlin included soft strip works, temporary works, large wall demolitions, forming openings, and demolition of RC walls, Floors and basement structures.

We found Timlin Construction to be hard working and efficient within tight working environments. Timlin construction proved themselves to be flexible and very responsive to changes during the progression of the project.

Timlin Construction operates a very high standard with regards to health and safety, fitting seamlessly into our own companies very high standards of Health & Safety.

On behalf of JPC I would have no hesitation in recommending Timlin Construction to any organisation who wishes to engage their services.

If you would like further information, you can contact me on my mobile number (087) 2419763

Yours sincerely,
For John Paul Construction Ltd

Peter O'Gorman
Project Manager
